

Coalport 1795-1926

This comprehensive survey and illustrated guide to Coalport porcelains integrates the history of the firm over 130 years with discussion of the many wares produced during the period, and examines the close relationship between these two elements. It thus provides a balance between the different periods. New patterns are illustrated, including a range of later-numbered patterns, as are profiles of wares, a feature which should make the shapes of pieces more apparent. The work of individual artists, including the important contribution of independent decorators in the early 19th century, is also examined, along with the fluctuations in trade, the development of styles and techniques, and the background influences which shaped production.
