

Metallography and Microstructure in Ancient and Historic Metals (Getty Trust Publications: Getty Conservation Institute)

This book provides an introduction to the structure and morphology of ancient and historic metallic materials. It deals extensively with many practical matters relating to the mounting, preparation, etching, polishing, and microscopy of metallic samples and includes an account of the way in which phase diagrams can be used to assist structural interpretation. The text is supplemented by an extensive number of microstructural studies carried out in the laboratory on ancient and historic metals.

Metallography and Microstructure in Ancient and Historic Metals (Getty Trust Publications: Getty Conservation Institute) by David A. Scott is senior scientist at the Getty Conservation Institute and head of the GCI Museum Research Laboratory. His publications include Ancient and Historic Metals and Metallography and Microstructure of Ancient and Historic Metals. Combining information on pigments and corrosion products, which are usually His publications include Ancient and Historic Metals, Metallography and Microstructure of Ancient and Historic Metals, and more than sixty published papers in conservation and scientific Getty Trust Publications: Getty Conservation Institute HISTORIC METALS.
