She is being slowly, inevitably pushed towards adulthood and a life that she does not fit. Peter Pan is the ruler of Neverland, an island stranded between universes and peopled by castaway philosophers, becalmed pirates, imprisoned Indians and lost children. Restless, he roams the many universes, eavesdropping upon the adult world from which he has fled. They meet, and Wendy bargains with Peter to take her and her brothers away from the adult world forever. She is unprepared for what she discovers in Neverland, and her emerging ability to control the very fabric of reality develops hand in hand with a burgeoning animosity between her and Peter. Lost in the mountains, forgotten by her brothers and the lost boys, Wendy begins to uncover the roots of an ancient magic which will change everything. Wendy must choose her allies carefully on Neverland, because worse things are coming than pirates And one of them might just be Peter Pan himself.
